

**Tur/Arhar Dal**

(Rs. Per kg)

	2003	2004	2005	2006(upto 20.11.06)
North Zone	28.65	32.03	31.41	33.60
West Zone	25.24	28.40	28.47	30.09
East Zone	27.40	30.32	29.51	30.87
South Zone	31.00	33.78	32.24	33.24
All-India	27.94	30.96	30.20	31.68

The maximum wholesale prices of Urad (whole) and Moong (whole) for Delhi for November 2006(upto 15.11.2006) and the corresponding period during the last three years are given below:

(Rs. Per Kg)

Year	Urad	Moong
2003	14.40	15.30
2004	18.75	19.50
2005	27.00	26.25
2006 (upto 15.11.2006)	36.00	35.00

(c) The reasons for rise in prices of pulses are shortfall in domestic supplies relative to demand and hardening of international prices.

(d) Government has already taken steps to check the increase in prices of pulses by taking measures for augmenting overall supply through permitting imports at zero duty and ban on exports of pulses.

**Imbalance in agricultural cost inputs and outputs**

\*54. SHRI MOINUL HASSAN: Will the Minister of AGRICULTURE be pleased to state the concrete steps Government propose to take in view of crash in prices of agricultural output and rise in cost of agricultural input which have adversely affected the interest of all sections among the peasantry?

**THE MINISTER OF AGRICULTURE (SHRI SHARD PAWAR):** The Minimum support Prices (MSPs) of major agricultural commodities have increased substantially over a period of time. A statement indicating the MSPs announced since 2000-01 is Annexed (See below). The MSPs are announced by the by the government after taking into account the recommendations of the Commission for Agricultural Costs and Prices (CACP), the views of State Government and Central Ministries as well as such other relevant factors which are considered important for fixation of support prices.

The CACP, while formulating its recommendations on prices policy considers the inputs provided by various State Governments as also a number of important factors which include cost of production. The cost of cultivation/production taken into account includes all paid out costs, such as, those incurred on account of hired human labour, bullock labour/machine labour (both hired and owned), cash and kind expenses on use of material inputs like seeds, fertilizers, manures, irrigation charges including cost of diesel/ electricity for operation of pump sets, etc. The cost of production covers not only actual expenses in cash and kind but also imputed value of owned assets including land and family labour. The cost of cultivation of various agricultural products is estimated through a Comprehensive Scheme for Studying the Cost of Cultivation of Principal Crops in India implemented through the State Agricultural Universities.

The thrust areas, inter-alia, include increase in production and productivity of various crops including oilseeds and pulses; diversification to the high value crops; strengthening of agriculture marketing infrastructure; promotion of agriculture extension; promotion of water and soil conservation through watershed approach under natural resources management; and extended insurance scheme for risk management.

**STATEMENT**  
**MINIMUM SUPPORT PRICES ANNOUNCED SINCE 2000-01**  
*(According to Crop Year)*

As on 30.10.2006
